

Free TV stations complained about cable TV the same way. They found a way improve their stations and even buy into cable. This is the same thing. Instead of complaining, radio owners should find ways to improve. This why I do not like the lobbyists system. The government needs to worry about more important things that are going on in the world. I have a right to be able to listen to this and any other content on satelite radio. I believe this is technology is the future and should not be forced to stop!
